The International Space Science Institute-Beijing, China

Invites application for the position of its

Executive Director

The International Space Science Institute-Beijing (ISSI-BJ) is an organization of advanced studies carrying out its work by attracting scientists from all over the world to its meetings in multi- and interdisciplinary research. ISSI-BJ was jointly established by the International Space Science Institute (ISSI) in Bern, Switzerland, and the National Space Science Center (NSSC, CAS) in Beijing, China, in July 2013. The main function of ISSI-BJ is to contribute to the achievement of deeper understanding of the results from different space science missions, ground based observations and laboratory experiments, adding value to those results through multidisciplinary research, by using ISSI operation tools such as workshop, working groups, forum, international teams and visiting scientists. ISSI-BJ also intends to open new scientific frontiers of all space science disciplines, to discuss the directions and scientific objectives and frontier technologies of future space science missions, by organizing self-selected or tailored forums. Benefiting from its location, ISSI-BJ could also provide opportunities to scientists to get to know the new Chinese space science programs and encourage international cooperation in space science. (Further information can be found on the website of ISSI-BJ: http://www.issibj.ac.cn)

The Executive Director position of ISSI-BJ is now open for global recruitment.
